

# CONTEU: Tokenizing Global Trade

Unlocking trillions in trapped logistics value

Building the world's first regulated marketplace connecting physical container capacity  
to blockchain-based liquidity

# The Problem

## ! \$25 Trillion Industry Crisis

Logistics industry remains illiquid, opaque, and inefficient despite massive scale

## ! SME Barriers

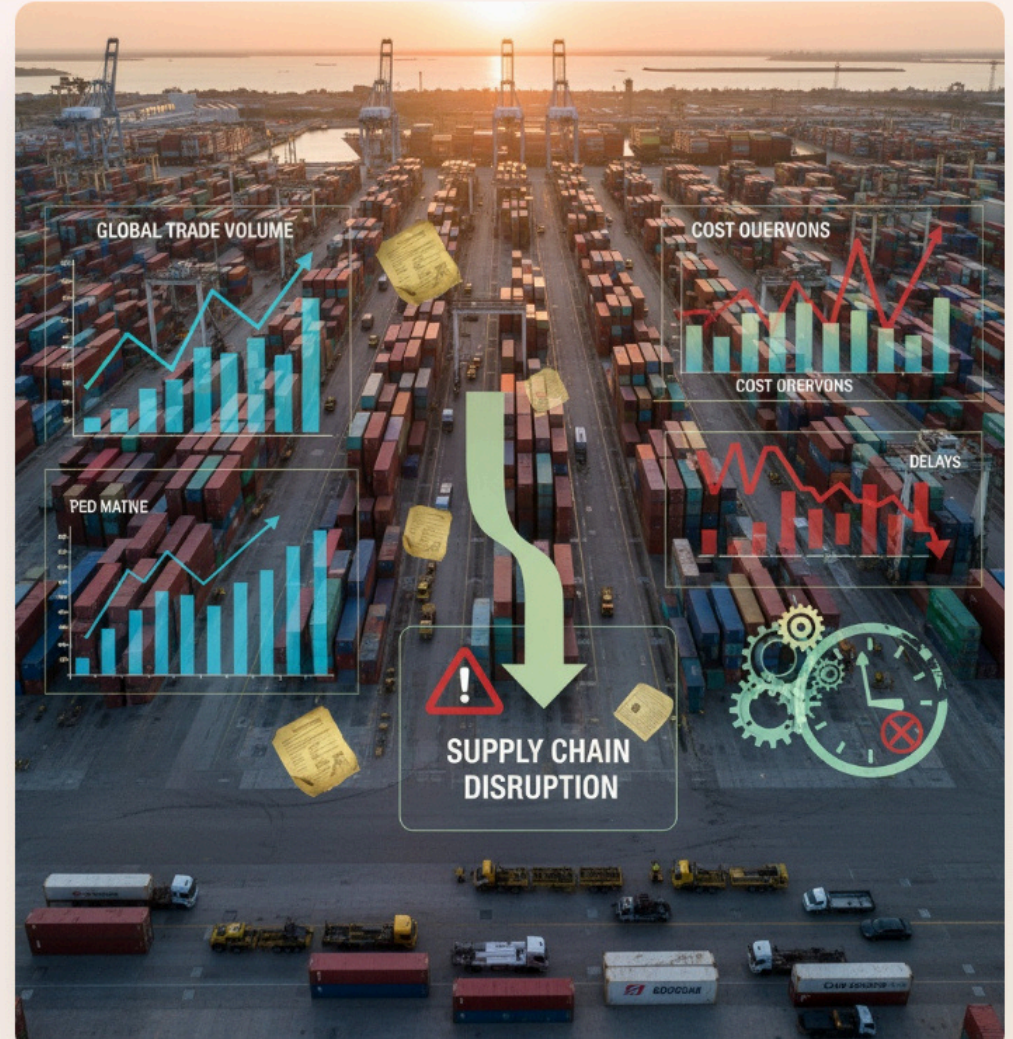

High capital requirements and outdated systems block small businesses from global trade

## ! Payment & Documentation

Manual processes cause delays, errors, and lack of transparency in transactions

## ! Locked Asset Value

Trillions in container assets cannot be traded, financed, or leveraged efficiently

# The Opportunity

**\$ \$12+ Trillion**

Annual global trade value waiting to be optimized

**30M+ Containers**

Shipping containers worldwide ready for tokenization

**>\$1T by 2030**

RWA tokenization market projected growth

**CONTEU bridges physical logistics with blockchain liquidity through fractional ownership and instant settlements**

# The Solution

## CTU Token Standard

1 CTU = 1 cm<sup>3</sup> of insured, verifiable container capacity

## Licensed Operations

Backed by Conteu Logistics (licensed NVOCC) with real freight operations

## IoT & Blockchain

Real-time tracking via IoT sensors with on-chain Proof-of-Reserve validation

## Instant Settlements

Enable instant payments, staking rewards, and cross-border settlements

# Dual-Pillar Ecosystem

## Pillar 1

### Real-World Operations

Conteu Logistics, Inc.

Licensed and insured NVOCC generating revenue from freight forwarding and container leasing operations

## Pillar 2

### Digital Asset Framework

CTU Token (BEP-20)

Fractional ownership of verified container space, backed by regulatory framework under Central Bank of Bahrain via ATME

# Business & Token Model

## Token Supply

33.1 Trillion CTU = 1M TEUs

1 CTU = 1 cm<sup>3</sup> of container capacity

## Blockchain Phases

Phase 1: BEP-20 (BNB Smart Chain) — Liquidity & access

Phase 2: SPL (Solana) — Scalability & micro-settlements

## Revenue Sources

- Freight margins & container leasing
- VASP custody & transfer fees
- DeFi staking & yield rewards

## Token Utility

- **Freight Payments:** Pay for shipping services
- **Booking Collateral:** Secure container reservations
- **Staking:** Earn yield on locked tokens
- **Governance:** Vote on protocol decisions

## Value Proposition

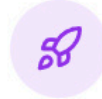

Transform illiquid physical assets into tradable digital tokens  
with instant liquidity and global access

# Market & Adoption Strategy

## Strategic Partnerships

Collaborate with logistics operators, IoT providers, and institutional token holders

## DEX Launch

Launch on PancakeSwap with institutional liquidity partners for immediate trading

## Media Visibility

Build brand awareness through partnerships (e.g., Cryptoflies) and industry events

## Early Adopter Incentives

Reward early users with staking bonuses, governance rights, and yield pools

## 2029 Goal

**1 Million TEUs Tokenized**

Establishing CONTEU as the global standard for container tokenization

# Technology & Security

## Multi-Layered Architecture

Securing value from code to cargo

### Blockchain Layers

BNB Smart Chain → Solana (bridged via Wormhole)

### Smart Contracts

Audited, upgradeable UUPS architecture for security and flexibility

### IoT Integration

Real-time container telemetry & Chainlink oracles for data validation

### Proof-of-Reserve

Verifies 1:1 physical-to-digital asset ratio with transparent audits

### Insurance & Audit

Third-party verified security with publicly transparent reporting

# Regulatory & Governance

## Jurisdiction

Base: Georgia

VASP License: Application with National Bank of Georgia (NBG)

## Strategic Partnership

ATME B.S.C.© — CBB-licensed exchange partner

Provides regulatory framework under Central Bank of Bahrain oversight

## Compliance

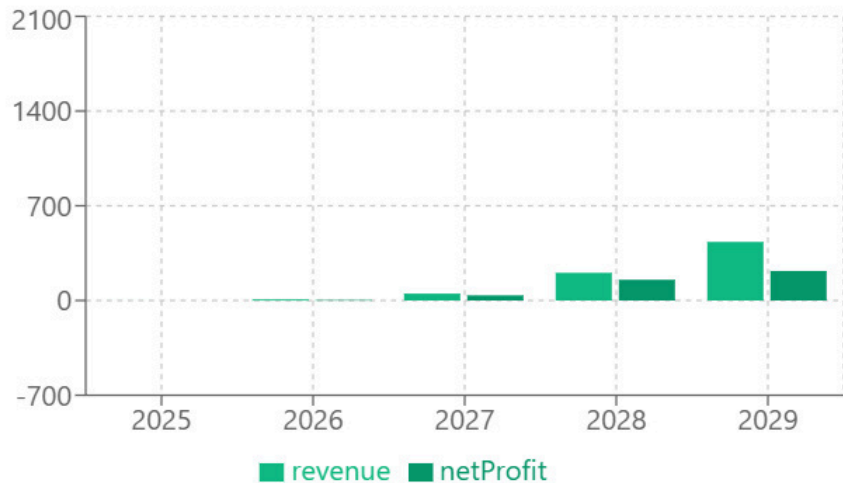

- Full AML/KYC procedures
- Quarterly Proof-of-Reserve audits
- Comprehensive cargo liability coverage

## Governance Evolution

- 1 Phase 1: Centralized**  
Board-led governance under regulatory oversight
- 2 Phase 2: Hybrid DAO**  
Community advisory voting with board execution
- 3 Phase 3: Full DAO**  
Complete community control and decentralized governance

# Financials & Growth (2025-2029)

## Revenue & Net Profit Growth

## Revenue Milestones

2025:	\$0.7M
2026:	\$37.5M
2027:	\$230M
2028:	\$925M
<b>2029:</b>	<b>\$1.96B</b>

## Key Metrics

Net Profit 2029: \$987.7M

EBITDA Margin: >75% by 2028

Growth Trajectory: Exponential scaling from -\$0.09M to \$987.7M

\$

CapEx

**\$3B**

Total for 1M TEUs

↗

CAGR

**~227%**

Net Income 2026-2029

**Sustainable, High-Margin Growth**

Backed by real assets and operations

# Roadmap

## Q4 2025 **BEP-20 Launch**

Token launch on BNB Smart Chain, NVOCC structure established

## 2026 **5,000+ TEUs**

IoT tracking live, initial container fleet operational

## 2027 **Solana Bridge**

Cross-chain integration, audited Proof-of-Reserve system

## 2028 **500,000 TEUs**

Mass adoption begins, DAO transition initiated

## 2029 **1M TEUs**

Full decentralization achieved, global market leadership

# The Ask & Our Offer

## 🎯 What We're Seeking

🤝 Strategic investors & exchange partners

💰 **\$10M seed/series round** to fund asset acquisition & regulatory scaling

**Join Us in Transforming Global Trade**

One container at a time

## 🎁 What We Offer

### Token Allocation

Pre-sale rate access for early investors

### Equity Participation

Institutional investors can participate in company equity

### Revenue Sharing

Long-term revenue sharing from real logistics operations

**Real Assets. Real Revenue. Real Returns.**
